

## **Maintenance employees**

### **TASK DESCRIPTION:**

Maintenance employees (both certified tradesmen and non certified maintenance employees) are responsible for ensuring safe and efficient operation of Company equipment and plant services within their area of expertise. In these roles, maintenance staff will support the PM program and assist the Maintenance Manager with daily maintenance tasks. Other responsibilities include compliance to GMP, HACCP and various government regulations.

### **Some of the key responsibilities, depending on your area of specialization, will include:**

- Helping to identify, prevent and resolve production downtime situations that could lead to ineffective operations.
- Servicing, repairing and installing fully automated production equipment, maintaining and troubleshooting pneumatic and hydraulic systems and completing electronics/PLC maintenance.
- Ensuring equipment, employee and food/product safety in a fast paced manufacturing and production environment, including ensuring adherence to equipment lockout procedures.
- Making sure all safety equipment is worn and/or used correctly and all equipment safety procedures are followed.
- Detect & trouble shoot equipment irregularities; repair & replace defective machinery parts;

Some of the skilled trades we employ include Electrical/instrumentation, Refrigeration, Welding, Millwrights and Mechanics.

### **Some of the equipment operated within our Service Centres include:**

- |                          |                               |
